

INJECTION QUILL

www.globeunitedae.com

MODEL IQL/ IQLR

Overview

In many industries, Chemical Injection Quill device used to inject high corrosive chemical between feed line and process line without damaging to the pipe wall. Mechanical Injection Quills helps in even dispersement of chemical into center of the pipeline to achieve the chemical reaction.

Retractable type of Injection Quill provide the added advantage of able to insert & remove into the feedline without disturbing the main process line. This minimise the downtime of the process and easy to service the Injection Quills.

Operating Principle

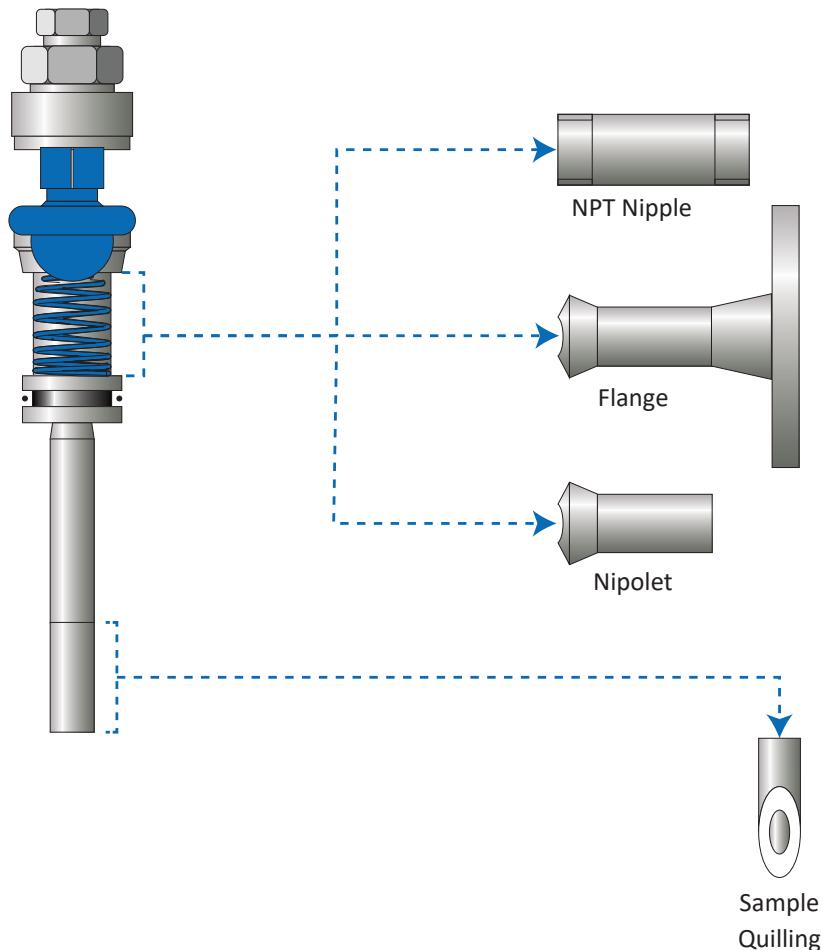

The Injection Quills are designed to be installed into the pipeline through a proper fitting assembly to ensure even distribution of the injected chemical to the process flow line. The other end is connected to the chemical feed line by suitable pipe connection from the skid. Injection quill has a spring-loaded ball check to prevent the back flow through the nozzle and main chemical flow line when the system is shut down.

Applications

- Chemical Treatment
- Separation Process
- Oil & Gas Process

The injection quill could come in various configuration, connections and fittings.

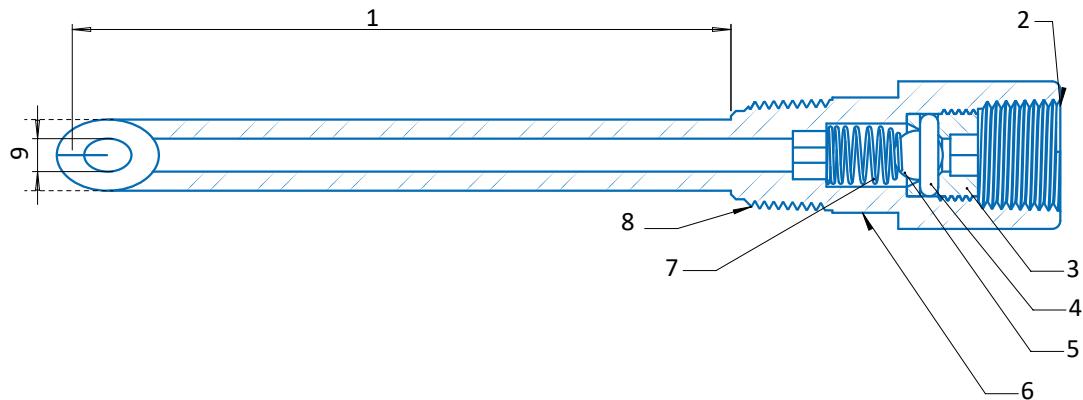

Chemical Injection and Sampling Assembly Components

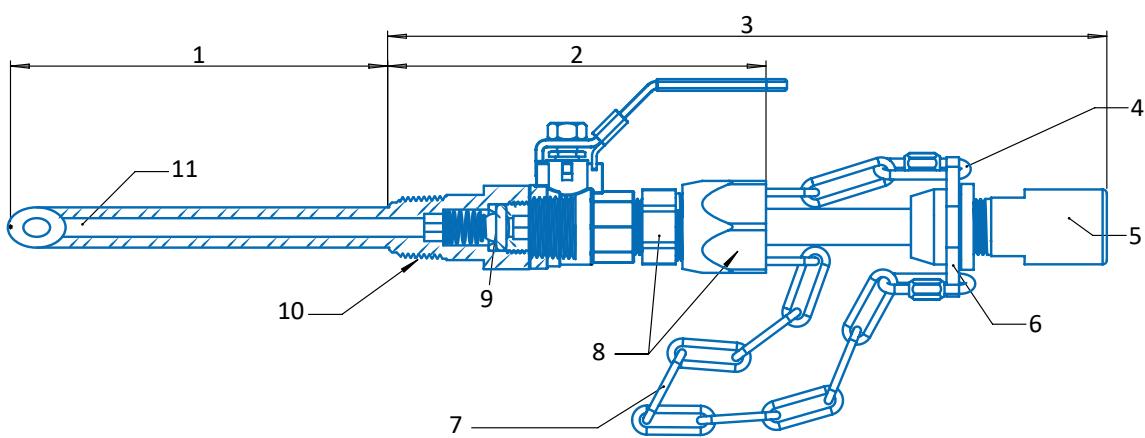

Diagram: Standard Version

Injection Quill

1. Stinger
2. Inlet Connection
3. Removable Valve Seat
4. O-ring
5. Ceramic Check Ball
6. Wrench Flats
7. Check Valve Spring
8. Process Connection
9. Notched Quilling

Retractable Injection Quill

1. Insertion Length
2. Valve Length
3. Installed Length
4. Stainless Steel Locking Safety Chain At Full Insertion
5. Female Npt Chemical Injection Quill With Optional Integrated Check Valve
6. Rotating Stainless Steel Chain Connection Flange
7. Stainless Steel Installation/ Retraction Safety Chain
8. Compression land With Viton™(Fkm) O-ring
9. Locking Ball Valve
10. Process Connection
11. Injection Quill Stinger

Why Choose Us?

With our manufacturing presence in SAIF Zone, Sharjah, UAE, we are able to offer

Variety of Graded Raw Material, sourced from Europe, Japan & North America

Intrusive Stage-wise Inspections as per Requirements

10+ years of Experience in Operation

Instant Availability Of Spare Parts

200+ Clients Worldwide

Team of 30+ Technical Professionals

Compliance to NDE Requirements as per Project Specifications

Prompt Site Service Support within the UAE And GCC

IQL.V0.05.0322
